

## FUNDAMENTAL SCIENCES:

An Association Study Between Spontaneous Abortion And The H475Y Polymorphism In The GcpiI Gene

Beneficial Effects Of Various Polyphenol Extracts On Diabetic Angiopathy

Correlations Between Endothelial Dysfunction And Circulating Endothelial Cells In Chronic Kidney Disease

EGFR And PTEN Genes Alterations In Astrocytomas

Evaluation Of Immunomodulating Cytokines In Rheumatoid Arthritis

Experimental Researches On The Effects Of Fluoxetine In Experimental Nociception

Forensic Facial Reconstructions: Anatomical Aspects Of Soft Tissues - Thickness Determination

Histological Aspects Of The Experimental Retinitis Pigmentosa

Immunohistochemical Expression Of Cyclooxygenase-2 (Cox-2) In Gastric Cancer - The Correlations With Tumor Angiogenesis And Patients' Survival

Implications Of Hypereosinophilia And Allergen Sensitization In Bronchial Asthma In Children

Insights Into Magnesium Orotate-Induced Cardioprotection: A Study In Isolated Rat Heart Mitochondria

Levels Of Oxidative Stress And Homocysteine In Patients Submitted To Hemodialysis

Magnesium Orotate Elicits Cardioprotective Effects At Reperfusion In Isolated Rat Hearts

Melatonin's Protective Effects Against Hypoxia - Induced Consequences

Molecular Mechanisms Regulating Adipogenesis In Mesenchymal Stem Cells And Tumor Associated Fibroblasts

Nitric Oxide Synthesis And Oxidative Stress Evaluation In Experimental High Blood Pressure After The Treatment With Allium Ursinum

Oxidative Stress Involvement In Experimental Chronic Alcoholic Hepatitis

Screening For The 35DelG Mutation In A Romanian Population Group

Semi-Automated Method For Serum Total Antioxidant Capacity Determination

Studies On The Role Of Overexpressed Genes In The Phagocytosis Process Of Human Macrophages

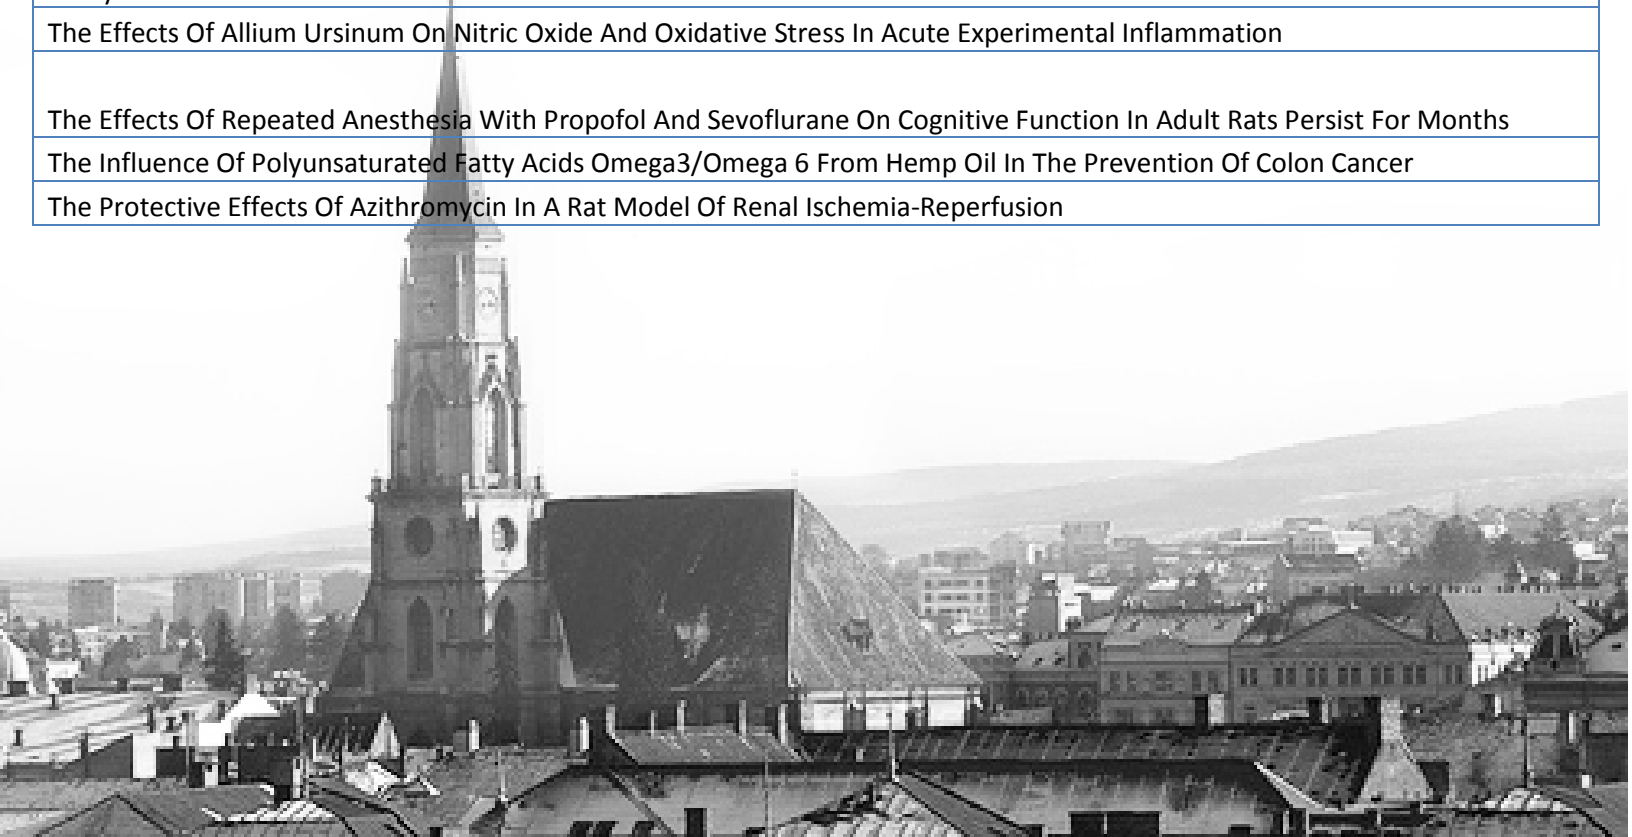

Study Of The Effects Of Inhaled Ozone In Rats

The Effects Of Allium Ursinum On Nitric Oxide And Oxidative Stress In Acute Experimental Inflammation

The Effects Of Repeated Anesthesia With Propofol And Sevoflurane On Cognitive Function In Adult Rats Persist For Months

The Influence Of Polyunsaturated Fatty Acids Omega3/Omega 6 From Hemp Oil In The Prevention Of Colon Cancer

The Protective Effects Of Azithromycin In A Rat Model Of Renal Ischemia-Reperfusion

# Medicalis

11th International Congress  
for Medical Students and Young Doctors  
13-16 may 2010, Cluj-Napoca - România
